## **DETAILED ACTION**

## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1 18, drawn to an apparatus for measuring strain, classified in class 73, subclass 777.
  - II. Claims 19 and 20, drawn to a method for fabricating a semiconductor device, classified in class 73, subclass 777.
  - III. Claims 21 22, drawn to a method for determining at least one of a pressure and temperature acting on a sensor, classified in class 438, subclass 109.
- 2. The inventions are distinct, each from the other because of the following reasons:

  Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, Invention II has separate utility from Invention I such as defining a semiconductor mesa with a desired lateral dimension. Invention III has separate utility from Invention I such as exposing a sensor comprising a metal semiconductor hybrid device to an environment.
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and Group III, restriction for examination purposes as indicated is proper.

Art Unit: 2855

- 5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 6. A telephone call was made to Paul Esatto, Jr. on September 9, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.
- 7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 8. Applicant is reminded that upon the cancellation of claims to non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
- 9. Any inquiry concerning this communication should be directed to Examiner Octavia Davis at telephone number (703) 306 5896. The examiner can normally be reached on Monday Thursdays (9:00 5:00), Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward Lefkowitz, can be reached on (571) 272 - 2180. The fax phone number for the organization where this application where this application or proceeding is assigned is (703) 872 - 9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (571) 272 - 2176.
